Flexible Picture Systems to Demonstrate Image AnyPlace and their Newest Video Scaler at InfoComm 2010

Las Vegas, NV—(June 9th, 2010) — Flexible Picture Systems (FPS), the leading supplier of high-end video and audio products for the professional AV and high-end Home Theater markets, is set to demonstrate the highly successful Image AnyPlace-200, in addition to introducing their latest line of video scalers OmniScale, at InfoComm 2010.

Image AnyPlace-200 (IA-200) is a Video/Graphics Scaler/Switcher with Geometry Correction and Edge Blending, and has continued to lead as the top choice in Image Geometry Correcting products over the years. Image AnyPlace has been in use on a large variety of project applications including Staged Events, Houses of Worship, Educational Facilities, Production Sets, and Domed Ceiling Projection. Demonstrations include real-time Geometry Correction and Edge Blending onto a circular screen, as well as a novel 3D High Definition Viewing System using off-the-shelf projectors, 1080p 3D content, Image AnyPlace-200 and a 108" projection screen.

FPS will also introduce OmniScale, a new video scaler intended for LED signs and video walls of ANY resolution, set to provide high-quality scaling and rotation from real-time video sources. The demonstration will consist of a continuous resizing of high resolution content to a variety of low-resolution destinations.

"We are pleased to be demonstrating such a wide variety of applications using our already popular Image AnyPlace-200, as well as to demonstrate for the first time our newest line of Video Scalers," said Steve Wood, President of Flexible Picture Systems. "FPS has continually provided quality products and contributed to the overall success of so many projects."

Flexible Picture Systems will be demonstrating at their booth number N1061 – June 9th – 11th, 2010. For more information on this product or Flexible Picture Systems, please visit www.flexiblepicturesystems.com
